COVERED PEST: Covers all crawling insects in the building, visible paper wasp nest(s) within reach under eaves and around doorways, plus Subterranean Termites

EXCLUDED PEST: Rodents, Fleas and ticks, Springtails, Tawny Crazy Ants, Leaf Cutter Ants, Birds, Fabric Pests, Pantry Pests, Mosquitoes, Bed Bugs, Drywood Termites, Formosan Termites

TREATMENT INCLUDES

Interior: Refer to the Signature EOM Maintenance Interior Protocol.

Exterior: Refer to the Signature EOM Maintenance Interior Protocol. In addition:

- Inspect all termite monitors replacing the components as needed. Inspection of the foundation wall is needed to discover termite activity such as shelter tubes, swarm castles, etc.
- If activity is found in the termite monitor dig a trench along the foundation wall 5 feet in length. The center of the trench should align with the active monitor. Treat the trench with Termidor® SC following the label directions.
- If activity is found along the foundation wall, dig a trench along the wall using the shelter tube as the center point of the 5 foot trench, approximately 2 ½ feet on each side. Treat the trench with Termidor® SC following the label directions.
- Any additional termite treatment to the structure should be noted on the graph and dated.
- All cardboard disk in monitors should be dated with the date of service and specialist's initials who conducted the service.

SPECIAL NOTES/ATTRIBUTES: *Any other activity that does not fall into the above criteria should be noted on the technician's paperwork and turned in to be scheduled on a Termite Specialist. If the customer is home, the technician should contact the scheduling department before leaving in order to expedite the treatment for the customer.*
