

NAME OF SERVICE: Leafcutter Ant Treatment Protocol

ATTRIBUTES: Check for attributes on the services for more treatment specifications.

TO INCLUDE: Treatment for Leafcutter Ants Only

COVERED PEST: Leaf Cutter Ants

EXCLUDED PEST: N/A

TREATMENT INCLUDES

Interior: **Exterior Treatment Only**

Exterior: Inspect the home and the area around it thoroughly.

- Look for defoliated areas or large holes in leaves and plant life.
- Inspect leaves, shrubs and other plants for stripped leaves. These will indicate areas of high leaf cutter ant activity.
- Inspect to locate all leafcutter ant mounds and trails that are on the property

Treatment

- Drench each mound by rodding with 2 to 5 gallons of a non-repellent insecticide per mound.
- Power spray all foraging trails with same non-repellent insecticide.
- Treat all shrubs that are currently being defoliated by the leafcutter ants and any shrubs that are nearby those shrubs, unless there are flowers present (Alpine WSG label does not allow application to flowering plants).

SPECIAL NOTES/ATTRIBUTES

10 to 14 days after the initial treatment the specialist will do a job completion repeating the same treatment protocol as stated except drenching of the mounds will not be necessary.
